

ENIGMA

VOLUME IV
ISSUE III

FIRST AID WORKSHOP

First Aid is the immediate help given to an injured person before the service of a doctor is provided. To assist the community during such circumstances, Hopetown Girls' School organized a First Aid workshop. This productive session enhanced our knowledge about dealing with emergency situations. The school had also formed a first aid team which will help carry out the process of immediate aid more effectively during emergency situations.

TALENT HUNT

To enhance the horizon and to set forth an open platform, the school organized a talent show for the new members of the Hopetown Community. This exercise instilled within them confidence and gave them a platform to showcase their abilities in the arena of singing, dance, drama, poetry, skating etc.

FLOW INDIA

The Flow India project became a part of the Middle School curriculum last year. The theme this year for the three day workshop was marketing. Grade VII and VIII were first introduced to marketing. Then, they visited different markets and interviewed shopkeepers. Later, they reviewed all the activities and analyzed the different trends of marketing. The workshop came to an end by a poster making competition which showcased their understanding on the topic.

EARTH WEEK

"What I stand for, is what I stand on".

Hopetavians abide by this motto and thus ever year engage themselves into a week where they contribute to the Earth. They involve themselves in various activities, spreading the message for conservation of the environment. This year the school marked the week by performing awareness skits. The Student Association for the Environment (SAFE), put posters all over the school campus and also organized an inter class slogan composition competition.
