Graduation Ceremony

School farewells and especially Grade 12 is easily one of the most emotional days in the lives of students, parents and teachers. Sadness at leaving behind friends and a carefree life especially at Hopetown Girls' School where there is so much love showered on each student. Happiness of stepping into a new world where opportunities await them.

On the 3rd of February Hopetown formally bid farewell to the Grade 12 batch. The ceremony was attended by parents, students and staff members. A number of students related their experiences during their years spent at Hopetown. Our Principal gave the closing speech which was very inspirational and affectionate.

Middle School Picnic

February is the perfect month to go out for picnics and enjoy the sunshine and the beauty of the green hills. The valleys at their nature's best and the fields as they move to and fro with the breezy air are almost a spiritual experience. On the 8th of February, 2020 our Middle School students went out for their picnics to different spots and had a great time. Here are a few glimpses:

Grade VI

Grade VI students went to Naubheegha, a small serene village. They undertook a 9 Km hike and among other things explored the urbanization of the village, the interconnectedness of the village life and the forests and the simplicity of the village life. The trip ended with a sumptuous meal at a local house where students were served organic food on a leaf plate. After a hearty meal, all the students headed back to school.

Grade VII

Grade VII students went to Anirudh Farms, Taoli Gaon where they explored the life and culture of village life. They interacted with different people in the village and also engaged in some self-reflective activities that were thought-provoking and fun at the same time.

Grade VIII

Grade VIII students went to Abhinav Farms where they explored sustainable methods of agricultural and dairy farming. The students had a great time with the different animals on the farm and explored different ways in which waste is reused and recycled in the farm.
